

Lighthouse Payments Services simplifies the EOB conversion process by offering this value added service with your existing lockbox. For customers with no current lockbox Lighthouse Payment Services will provide a remote scanning solution or offers a bank neutral wholesale lockbox. Our solutions offer the convenience of capturing and batching the received images in preparation for conversion to manufactured ANSI 835 file format for auto-posting. Our online portal FUSE provides automated reconciliation back to the Bank deposit. The original paper remittance, patient statement and payment, or correspondence is retained and viewable within the portal.

#### Features & Benefits

- EOBX works jointly with your existing Bank lockbox or can be powered using our Lighthouse Payments Services remote or wholesale lockbox service
- EOBX creates ANSI 835 files or customized formats that can be auto-posted into the existing Patient Accounting, Practice Management, HIS, and Document Management System
- EOBX offers splitting of remittance files on as necessary on Tax ID, NPI, Institutional, Professional, Payer, Billing System, and other fields as needed.
- EOBX extends the capabilities of our FUSE solution where manufactured remittance files are loaded and reconciled to the corresponding bank deposits
- EOBX also converts patient payment and statement coupons along with correspondence files for auto-posting purposes
- Eliminates manual reconciliation and manual posting of paper based remittances
- Our non-disruptive approach compliments your existing clearinghouse, bank and lockbox, billing and accounting system and billing agency or service.
- Automate the importing of EOBs and PDFs from Payer Portals and Clearinghouses by enabling our automation solution "AutoPort"

FUSE is a Bank and Clearinghouse neutral offering that adds extensive customizable processing logic to any existing Bank, Patient Accounting / Practice Management System, Clearinghouse, Lockbox and/or Document Management System; FUSE compliments these existing platforms and technologies.
