

# Reconciliation Automation

## Transaction Intelligence for Healthcare.

Lighthouse Payment Services is focused on improving healthcare results through transaction intelligence. Our core product, FUSE, eliminates the manual reconciliation of remittances to deposits, along with the manual posting of payments into the Patient Accounting or Practice Management System.

FUSE is the industry's premier Bank, Clearinghouse, and Billing System neutral offering; we work in tandem with these existing technologies. The solution increases revenue, shortens the associated revenue cycle, and significantly decreases manual processing costs.

- Significantly increases access to working capital
- Expedites cash posting
- Drastically lowers AR days
- Eliminates the manual keying of paper EOBs and Patient Payments
- Enables your FTE resources to work on revenue generating tasks, denials, underpayments, and follow up
- Automate the importing of EOBs and PDFs from Payer Portals and Clearinghouses by enabling our automation solution "AutoPort"
